PROJECT

SocialNetworkAPI
- Repo: https://github.com/Collzbaba/social-network-api
- Demo: https://vimeo.com/763662187
- Built a Social Network API using Mongoose to create the User, Thought, Reaction and Schema in the models that is ready to connect to the front end.
- Utilized Insomnia, the user can GET, PUT, POST, and DELETE the user's thoughts, friends and reactions by using the URLs.
- Used: Express.js, Note.js, MongoDB, NoSQL, and Mongoose

MVCTechBlog

- Repo: https://github.com/Collzbaba/Mvc-Tech-Blog
- Deployed: https://blessed-mvc-tech-blog.herokuapp.com/dashboard
- Built a CMS-style blog where developers can publish their blog posts and comment on other developers' posts as well.
- This application is both Frontend and Backend programming, which uses HTML, CSS, Express, Node, MySQL, Sequelize, and ORM.
- Used the utils and public files in JS as handlebars to connect the front-end views.

PrimaryKeysRentals

- Repo: https://github.com/Collzbaba/Primary-Keys-Rentals
- Deployed: https://primary-keys-rentals.herokuapp.com/login
- Built a full-stack web app to allow users to simulate and visualize outcomes of renting cars in different categories in a fast and convenient way.
- Utilized Express in Node.js to simulate customers renting cars by the hourly rate.
- Used: JavaScript, HTML, Bootstrap, CSS(Animate.css), Express.js, Node.js, MySQL, Sequelize, MVC

EcommerceBackEnd
- Repo: https://github.com/Collzbaba/Object-Relational-Mapping
- Demo: https://kapwi.ng/w/5pFaqt5ATQ
- Created this application for Internet retail also known as e-commerce, which routes are being tested in Insomnia Core for the GET, POST, PUT, and DELETE routes to return all categories, all products, and all tags are tested.

- This application is mainly used Express.js API and configure to use Sequelize to interact with a MySQL database.
